### About Hamburg

Seventy miles from the sea, on the Elbe River in northern Germany, Hamburg is the second largest port city in Europe and one of Germany's most cosmopolitan, dynamic and fascinating destinations. The city has some 2,000 plus bridges – more than Venice and Amsterdam combined,

earning Hamburg the moniker the 'Venice of the North'. The city's architectural highlights include 17th century brick and timber houses, the massive St Michael's Church with its spectacular baroque interior, the imposing neo-Renaissance town hall, and the historic redbrick warehouse district.

Alternatively, there may be an opportunity to visit the nearby World Heritage city of Lübeck with its beautiful Old Town, resplendent with gabled houses and ancient churches.

## About the Queen Mary 2

Technically classed as an ocean liner, Queen Mary 2 harks back to the golden age of ocean travel with her grand décor and furnishings, as well as her iconic transatlantic voyages between Southampton and New York. Cunard prides itself on the small details and this guarantees a truly regal cruising experience with first class food and entertainment, endless activities to amuse and occupy the time, as well as plus countless quiet spaces simply to relax or read. All in all, every element of Queen Mary 2 exudes elegance and sophistication.
